

Weekly Safety Meeting Near Misses

Date:	Jobsite:
-------	----------

Most accidents occur as a result of an unsafe condition or unsafe action coming together with a person. The end result is the person gets injured. Often unsafe acond tions have several mistires and the results is a near miss accident or incident. The only difference between a near miss and an accident is luck. Safety conscious companies make a near miss a big deal – so do we. Collide for Discussion	Discussion Leader:	Summary
between a near miss and an accident is luck. Safety conscious companies make a near miss a big deal – so do we. Guide for Discussion - Near misses are injuries without people Near misses are not funny; they are often deadly Near misses are not funny; they are often deadly Near misses are not funny; they are often deadly Near misses are not funny; they are often deadly Take immediate action to prevent a similar near miss If you did not cause a near miss but saw it, discuss it with those involved and your supervisor Obey safety rules and you will decrease the number of near misses around you Additional Discussion Notes: - Describe corporate near miss reporting procedure: - Describe company's responsibility to investigate near miss accidents and take corrective actions: - Describe company's responsibility to investigate near miss accidents and take corrective actions: - Remember	Discussion Leader.
