

Weekly Safety Meeting Shop Safety

Date:	Jobsite:

Discussion Leader: Instructor Note: Perform a self-inspection prior to making a shop safety presentation. Look for anything that is out of place. Check against the Guide for Discussion for items to point out. The safe work practices we do in our shop are often the same practices we take out of our shop and into our homes. What we want to	ne
Attendance Sign- In: Guide for Discussion for items to point out.	
Attendance Sign- In:	
The safe work practices we do in our shop are often the same practices we take out of our shop and into our homes. What we want to	
The sale work practices we do in our shop are often the same practices we take out or our shop and into our nomes. What we want to)
talk about today is what makes shop safety a little different than what we normally do.	
Guide for Discussion	
Discuss in-shop procedures initiated to ensure that frequent and regular inspections are conducted to identify potential hazards in	
materials and equipment in the shop by:	
Individuals	
Supervisors	
Safety Committee	
Based on self-inspection, identify and point out slip, trip hazards on walking/working surfaces; overhead dangers (like cranes), moving	n
equipment (like forklifts), and general good housekeeping (like slip, trip or fall hazards).	9
Discuss location of key information including emergency medical plan, hazard communications (MSDS binder), fire extinguishers, fire	ļ
evacuation signs and routes. Employer posters, Safety Committee meeting minutes posted.	
Discuss power operated tools and equipment machine guarding, anti-kickback devices, personal protective equipment that is require	ed
to be worn when operating machinery.	
Additional Discussion Notes:	
Employee qualification program to operate machines requirements (if any):	
Employee qualification program to operate machines requirements (if any):	
Self-inspection checklists:	
Remember	
The safe work practices we bring into the shop are often the same safe work practices we take out of the shop onto the job and then	
our homes. For example: Just as you wouldn't want a slipping/tripping hazard on a set of stairs, you don't want the same hazard on o	ur
shop floor. Think safety.
