

## <u>Weekly Safety Meeting</u> PPE – Respirators

Date:	Jobsite:
-------	----------

Discussion Leader:	Summary
	Instructor Note: Prior to making a safety presentation, obtain and review your company respirator protection program.
Attendance Sign- In:	Our company has developed a separate respirator protection program. It is an important program because of the exposures we face in the workplace. We want to protect your body and lungs.  Guide for Discussion
	<ul> <li>Generally:</li> <li>No respiratory program is required when filtering-facepiece respirators are the only respirator used and they are used voluntarily.</li> <li>Respirators will be worn when the employee is exposed to hazards such as fumes, gases, mists, vapors and sprays</li> <li>Fit testing shall occur prior to allowing an employee to wear the respirator.</li> <li>Employees should be fit tested at minimum of annually to ensure the employee is putting on the respirator properly.</li> <li>Respirators shall be kept in a sanitary condition, covered at all times when not in use.</li> <li>Respirator training should be conducted prior to wearing the respirator for the first time.</li> </ul>
	<ul> <li>Company Specific - we want all our line employees to: <ul> <li>Inspect the respirator before each use.</li> <li>Know how to properly don/fit their respirator.</li> <li>Conduct a positive pressure or negative pressure check with each use.</li> <li>Report any and all problems to your supervisor.</li> <li>Take proper care of the respirator.</li> <li>Never hang respirator on a nail or leave exposed to dust.</li> </ul> </li> </ul>
	Additional Discussion Notes:  Company Respirator Protection Program notes:
	Remember The reason we wear respirator is to protect our lungs and bodies against hazardous fumes, gases, mists, vapors or sprays.
