

<u>Weekly Safety Meeting</u> Job Site Hazards – Power Lines and Mobile Cranes

Date:	Jobsite:
-------	----------

Discussion Leader:	Summary
	It is not uncommon to work around power lines; however, the potential hazards to workers are enormous; workers just have to work
Attendance Sign- In:	safer. Guide for Discussion
	duide for Discussion
	How to Avoid Electrocution
	 Locate all power supplies. Besides this being the state law, it's smart.
	Have the Power Company inform you of the voltage and arc distances.
	Shut off or insulate the power line(s) if possible.
	Never allow a piece of equipment to break the safety zone (the distance required to avoid electric arc.)
	General Rules to Remember
	Designate a competent lead signal person.
	Communicate clearly with all members of the work crew.
	Have all crewmembers watch the operation.
	Be alert.
	Watch for non-alert crewmembers.
	Additional Discussion Notes:
- 	
	Remember
	Whenever you are near a power line, be sure to minimize the risk by de-energizing or insulating the power source. Only then proceed
	with caution. At all times, try to avoid entering an arc zone. It is far better to be safe than sorry.
